

Edible Science

TUESDAYS AT BANCROFT ELEMENTARY JAN. 17TH TO MARCH 14TH

This tasty class uses food to help teach kids about science!! Join us as we use cereal to understand atoms! Or see how we learn about outer space and other planets with the help of cookies!! By combining science with tasty treats, kids get more involved and excited to learn. The best part is your budding scientist gets to taste their experiments after the class is over! Students will be given a small amount of the foods used in each class at the end of the day!

WHAT BETTER WAY TO LEARN THAN TO COMBINE SCIENCE AND FUN FOOD?

Who: 1st to 5th grades
Cost: \$210 for 10 classes (includes \$30 materials fee)
